

AMENDMENTS TO THE SPECIFICATION

Please amend the Abstract of the Disclosure as follows.

In a A connection method for connecting an end of a signal wire (53) of a cable (51) to the connecting face of a contact (59) of a connector (52) ~~the cable (51), in which the~~ The lengthwise direction of the connecting face of the contact (59) and the lengthwise direction of the signal wire conductor (53) are mutually matched in connection. The ~~the~~ end of the signal wire (53) is pressured against the connecting part by a pair of electrodes (69A, 69B) disposed in mutual separation in the lengthwise direction of the signal wire (53), and an electric current is passed between the pair of electrodes (69A, 69B). Thereby, ~~and thereby~~ the end of the cable (51) and the connecting part are mutually welded.
